

citisen™ - OnePay

The screenshot shows a mobile app interface for the 'citisen portal'. At the top, it displays the time 2:37 and the URL dev.citisenportal.com. Below the header, there are links for 'Log in / Register' and 'Pay as Guest'. The main content area is titled 'Guest Checkout - Find and Pay an Account'. It features several input fields: 'Office Name' with a dropdown menu showing 'Castle Rock Trustee - One Pay', 'Payment Type' with a dropdown menu showing 'Christmas Parade Permits', '*First Name' with the text 'John', '*Last Name' with the text 'Keats', and '*License Plate of Vehicle in Parade' with the text '555TLO'. There is a reCAPTCHA security check and a 'Pay Account' button at the bottom.

citisen™ - OnePay is the latest addition to the **citisen™** portal. OnePay may be used to help your office collect online and in-person/counter credit card payments for any number of various fees that are not receipted through LGC's software.

Some examples of these fees include: ambulance billing, citations, utility deposits, permits, business license, parade permits, as well as any other miscellaneous fee types.

If you have multiple types of payments that you want to offer your residents the ability to pay online, you could house them all in one place with a drop-down selection. This option provides your residents with one convenient, online location to make any payments they need.

OnePay has the option of adding up to 4 customizable fields for each payment type. The information captured within these fields will then

be included in the reports your office runs and will help you easily identify and distinguish all the necessary receipting information.

With each payment type, you also have the ability to create a default payment amount. The default payment amount will appear any time this particular payment is selected. This would be beneficial for when the payment amount will not need to be changed. This type of payment could be a burn permit for example, where the price is always the same.

Each payment type may also be set up with a default starting payment amount, with the ability for the resident to change it, for instances when fees may need to increase on an individual basis.
